ANKUR PAL

Data Analyst | SQL · Python · Power BI · Tableau · Snowflake

+91 8299098405 | palankurhs1998@gmail.com | Lucknow, India

LinkedIn | GitHub | HackerRank

PROFESSIONAL SUMMARY

Data Analyst with 2.8+ years of hands-on experience in data validation, SQL, ETL/ELT workflows, database testing, CRM integrations, and business intelligence reporting. Skilled in cleaning, transforming, reconciling, and analyzing data using SQL, Python, Excel, Power BI, and Tableau. Hands-on with SQL Server and Snowflake, HubSpot CRM/API integrations, Airbyte, Skyvia, forecasting, and dashboard development, with a strong focus on data accuracy, data quality, and actionable business insights.

TECHNICAL SKILLS

Analytics & BI: Power BI (DAX, Power Query), Tableau, Excel (advanced formulas), KPI Development, Dashboarding, A/B Testing, ARIMA Forecasting

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL

Databases: SQL Server, Snowflake, PostgreSQL, MySQL, SQLite

SQL & Data Quality: Joins, CTEs, Subqueries, Stored Procedures, Indexes, Query Optimization, Database Testing, Data Validation, Data Cleaning, Data Transformation, Reconciliation

Data Engineering & Integration: ETL/ELT Pipelines, Airbyte, Skyvia, HubSpot CRM, HubSpot API, REST APIs

Tools & Frameworks: Git, Docker, Flask, FastAPI, VS Code, SSMS

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Pahal Horizon

Apr 2025 – Oct 2025 | *Contract, Remote*

- Built Python and SQL pipelines handling 10,000+ daily records and reduced processing time from approximately 8 minutes to 3 minutes through index tuning and partition pruning.
- Developed ARIMA time-series models to forecast journal activity, using ADF tests for stationarity and ACF/PACF plots for model selection and validation.
- Designed a scheduling dashboard from forecast outputs to support planning and event-participation decisions across operating cycles.

Data Validation Representative (Data Engineering & BI) | Codvo.AI

Jan 2024 – Mar 2025 | *Remote*

- Worked with data received through SQL-based pipelines, processing and loading incoming datasets into an internal data validation tool for downstream quality checks and validation activities.
- Performed data cleaning, validation, transformation, and reconciliation in Excel using advanced formulas to identify missing values, duplicates, mismatches, and inconsistent records.
- Worked extensively with SQL Server to execute, test, and optimize queries on incoming data using joins, CTEs, stored procedures, indexes, subqueries, and query-optimization techniques.
- Performed database testing through custom SQL queries to verify data accuracy, completeness, consistency, and expected business logic.
- Built Power BI reports and dashboards to visualize project data, KPIs, trends, and validation results for business and internal stakeholders.
- Supported CRM data integration workflows using HubSpot, Airbyte, Skyvia, and SQL Server, including data extraction, validation, synchronization, and movement between source systems and HubSpot.
- Worked with API integrations to fetch sales and CRM data from HubSpot Sales Hub for downstream processing and reporting requirements.
- Worked with Snowflake for connection setup and SQL query execution, with exposure to Snowflake architecture, databases, schemas, warehouses, and cloud data-warehouse concepts.
- Received the Rising Beacon Award in Jul 2024 for contributions to project delivery and data-related work.

Associate Frontend Engineer | AskGalore Digital India Pvt Ltd

Jul 2023 – Jan 2024 | *Bhopal*

- Designed and conducted **A/B tests** on AskGalore.com (Next.js, React, Tailwind) that increased click-through rates by **12%**, with data-backed results adopted by the product team for UI decisions.
- Designed **Power BI dashboards** for client businesses (Charcoal Eats, BBurger) tracking sales revenue trends, order volumes, and peak-hour traffic patterns from Wix Stores transaction data — enabling data-driven inventory and staffing decisions that reduced operational waste by an estimated **15%**.
- Developed a **Python automation utility** (scikit-image, Pillow, pdf2image) to convert PDFs into auto-corrected images, eliminating **90% of manual corrections** and streamlining document processing workflows.
- Built client websites (Strategii At Work, Charcoal Eats, BBurger) on Wix with Velo scripting, SEO optimization, and Wix Stores payment setup — driving a **25% increase in monthly sales revenue**.

Freelance Data Analytics Consultant | Independent Projects

Oct 2022 – Jun 2023 | Remote

- Built **Python/SQL data workflows** and **Power BI dashboards** across retail, healthcare, and digital-marketing domains — transforming raw operational data into structured reporting layers.
- Analyzed delivery-route inefficiencies, resource-utilization gaps, and business performance trends — delivering actionable insights that supported better reporting and resource-allocation decisions.

KEY PROJECTS

IPL Ball-by-Ball & Time-Series Intelligence · Python · SQL · Streamlit · Power BI · ARIMA · Oct 2026

- Ingested and transformed 283,000+ ball-by-ball deliveries and 1,193 matches (2008–2026) into an SQLite warehouse; proved via hypothesis testing that the toss-win advantage evaporated post-2016 ($p=0.011 \rightarrow p=0.115$) as teams shifted to chasing (+26.8%).
- Modeled phase-wise scoring trajectories using ARIMA time-series (Powerplay, Middle, Death Overs) with ADF stationarity ($p<0.05$) and Ljung-Box white noise tests ($p>0.99$), capturing the 2023–2026 Impact Player rule explosion (death overs surging past 12.8+ rpo).

E-Commerce Revenue Segmentation · Python · SQL · Tableau · August 2026

- Engineered RFM quintile segmentation across 116,967 Brazilian e-commerce orders (R$ 46.9M GMV) using SQL CTEs and NTILE(5) window ranking, revealing the top customer tier generated 72.4% of total revenue.
- Discovered a 2.3× – 3.1× churn risk multiplier among VIP customers experiencing delivery delays (causing CSAT ratings to plunge from 4.79 to 1.45 stars); designed an executive Tableau dashboard with 25+ LOD calculations and regional logistics heatmaps.

HR Attrition Risk Dashboard · Python · SQL · Power BI · Scikit-Learn · June 2026

- Architected a Kimball Star Schema data warehouse in SQLite and trained a Scikit-Learn logistic regression pipeline across 1,470 employee records, achieving 86.1% holdout accuracy and 0.84 ROC-AUC.
- Identified via odds-ratio analysis (4.14×) that overtime workers earning below-median salary faced a 3.40× attrition spike (43.1% vs 12.7% baseline); engineered 28 DAX measures in Power BI surfacing $12.6M in turnover financial exposure and department flight-risk indices.

Oct 2025 – Present: Self-directed portfolio development focused on advanced SQL, business analytics, data modeling, forecasting, and cloud data architecture.

CERTIFICATIONS

- SQL (Intermediate) & SQL (Basic) Certified – HackerRank | 4-Star Badge
- Python (Basic) Certified – HackerRank | 4-Star Badge
- Power BI, Tableau, Python & SQL Certification – Skill-Lync Academy | Dec 2022 – May 2023
- Rising Beacon Award – Codvo.AI | Jul 2024

EDUCATION

B.Tech, Civil Engineering | Babu Banarasi Das Northern India Institute of Technology, Lucknow | 2017 – 2021
